Dear SBGN editors,

Please find attached some presentations and tutorials on SBGN for
consideration for the 'Outreach' section of your SBGN competition.
I'll be running this tutorial at the EraSysBio Summer school on Data
Management and Modelling, July 24-29 2010.

The main aims of the tutorial are to raise enthusiasm for SBGN
amongst the 25 or so students/early postdocs attending the meeting, to
get them familiar with the notations, and to give them experience in
drawing diagrams in SBGN.

There are 2 files attached:
SBGN.zip contains a Powerpoint presentation
(SBGN_tutorial_presentation), a tutorial (SBGNTutorial.pdf) and
various background resources.

CellDesigner.zip contains a tutorial script, resources, and
example completed diagrams for gaining experience in using
CellDesigner to draw SBGN compliant diagrams
